Cholecystectomy Episode Reimbursement Program

The Arkansas Health Care Payment Improvement Initiative (AHCPII) was developed as a joint effort between Arkansas Medicaid, QualChoice and Arkansas Blue Cross and Blue Shield, its affiliates and subsidiaries (Arkansas Blue Cross). More information may be found within this [manual](#) or at www.paymentinitiative.org.

The **Cholecystectomy** Episode Program (Program) will incentivize better coordination of care, encourage clinical effectiveness, and reward high quality care in order to reduce complications that threaten quality and increase costs.

Episode Definition

This episode includes all care related to the procedure. The episode begins on the date of the procedure and includes all related services during the cholecystectomy through 90 days after the procedure, including inpatient and outpatient facility services, professional services, and related medications.

Principal Accountable Provider (PAP)

The PAP for the Cholecystectomy episode is the primary surgeon performing the Cholecystectomy procedure. The PAP for each episode is identified retrospectively through claims data. As leaders, however, PAPs will share in the savings and excess costs of episodes. A provider must have five or more eligible cases of an episode to be considered a PAP. For example, a physician must have performed at least five eligible Cholecystectomy episodes. The provider billing for the service on the claim is held responsible in the episode calculations. For this reason accurate coding is essential.

Claims Submission

Claims filing procedures will be the same as they are today as described in Arkansas Blue Cross' Provider Network Agreements and provider manuals.

Supplemental Quality Measures

In order to participate in upside savings, providers must meet:

1. A quality metric related to the 30-day readmission rate using the same re-admission criteria as CMS.
2. Additionally, PAPs will receive reports highlighting their performance on common bile duct injury, abdominal blood vessel injury, bowel injury, the number of laparoscopic cholecystectomies converted to open surgeries, the number of cholecystectomies initiated via open surgery and the percent of episodes with CT scan prior to cholecystectomy, if applicable, for each patient must be entered via the AHIN portal in order for the PAP to participate in sharing any applicable savings.

Adjustments and Exclusions

Cholecystectomy Algorithm Summary v1.6

Triggers	An episode is triggered when a patient shows a claim with a Cholecystectomy CPT procedure code. The patient’s claims will also be processed by the OptumInsights ETG software, where they must be assigned an Episode Treatment Group (ETG) for “Cholelithiasis...with surgery” or “Other diseases of hepatobiliary system, with surgery”. For specific ICD-9-CM, DRG, and CPT/HCPCS procedure codes, please see dataset.
PAP assignment	The Principal Accountable Provider (PAP) for an episode is the physician enrolled in an Arkansas Blue Plan provider network who performs the cholecystectomy procedure.
Exclusions	<p>Episodes meeting one or more of the following criteria will be excluded:</p> <ul style="list-style-type: none"> A. The patient has claims or enrollment records that indicate coordination of benefits with another payer not associated with the Arkansas Blue Plans within the duration of the episode B. The patient does not have continuous coverage with at least one Arkansas Blue Plan throughout the entire episode C. Provider terminated prior to report publication D. Procedure occurred late in the performance period, episode will likely appear on next report E. The overall episode cost for the patient exceeds the outlier criteria. Currently, the outlier threshold is set at three standard deviations above the average episode cost for all patients otherwise included in the reporting period for all PAPs F. Episode overlaps with another episode G. Intensive care within 30 days prior to the trigger H. Procedure as an open surgery I. Procedure began laparoscopic and converted to open J. The patient was discharged against medical advice or due to expiration. K. Patient was pregnant during episode L. Patient less than 1 year old M. Patient 65 years or older N. Patient has a claim in episode with a DRG of 1) other female reproductive system operating room procedures without complication and comorbidities/major complication and comorbidities O. Patient has a concurrent diagnosis of: 1) Acute pancreatitis, 2) Cholangitis, 3) Cirrhosis P. Patient claims indicate one of the following comorbidities within 365 days before the trigger procedure and within 90 days after the trigger procedure: 1) Transplant, 2) Dialysis, 3) ESRD (end-stage renal disease), 4) Suicide and intentional self-inflicted injury, 5) Cancer, 6) Certain complications of pregnancy, 7) HIV, 8) Sickle cell anemia Q. Patient is an Exchange member R. Patient is an Access Only member S. Non-par self-insured groups: ABB Inc. (ABB/Baldor and Thomas & Betts), Green Bay Packaging, Hytrol Conveyor Co, Inc, Mana, Nabholz Inc, Navistar Inc, NYSC NYS Holding Company (Nucor), Replacement Parts, Riceland Foods Inc, Southern Steel & Wire (effective 1/1/16), and White River Medical Center

Provider Network Operations (PNO) provides centralized administrative services for Arkansas Blue Cross and Blue Shield, Health Advantage and USABLE Corporation provider networks.

Cholecystectomy Algorithm Summary v1.6

Episode time window	The episode begins the day of the trigger procedure and ends 90 days after the trigger procedure.
Claims included	<p>The following services are included in the episode:</p> <ul style="list-style-type: none"> A. Claims with an ETG “Cholelithiasis...with surgery” or “Other diseases of hepatobiliary system, with surgery” within 90 days of the trigger procedure B. All claims for inpatient admissions within 30 days after the discharge from the inpatient stay for the surgery. Claims with a DRG on the CMS list of exclusions for gastrointestinal procedures will not be included in the episode. C. Claims for anesthesia that are within two days of the trigger
Quality measures	<p><u>Quality measures “to pass” (payment related):</u></p> <ul style="list-style-type: none"> A. There are currently no measures linked to Gain Sharing. <p><u>Quality measures “to track” (not payment related):</u></p> <ul style="list-style-type: none"> A. Bile duct injury rate – Percentage of episodes with claims having a diagnosis indicating a bile duct injury on the Quality list. B. Abdominal blood vessel injury rate – The percentage of episodes with a diagnosis indicating an abdominal blood vessel injury on the Quality list. C. CT Rate – Percentage of episodes within 30 days prior to trigger procedure indicating a CT Scan procedure code D. GI perforation rate – The percentage of episodes with a diagnosis indicating a gastrointestinal perforation on the Quality list.
Utilization Measures	<p><u>Utilization measures “to track” (not payment related):</u></p> <ul style="list-style-type: none"> A. Open procedure - Number of procedures performed as “Open” identified by the trigger procedure code billed without diagnosis V64.41 B. Converted procedure - Number of procedures initiated as “Laparoscopic” and converted to “Open” – Identified by the trigger procedure code billed with diagnosis V64.41
Adjustments	The total reimbursements attributed to the PAP will be adjusted based on complications that resulted in variations in treatment using a multiplier determined by regression. Over time, risk factors may be added or subtracted based on new research and/or empirical evidence.
Trigger codes	<p>Claims with following CPT codes are considered when triggering an episode:</p> <p>CPT: 47562, 47563, 47564, 47570, 47600, 47605, 47610, 47612, 47620</p>

Provider Network Operations (PNO) provides centralized administrative services for Arkansas Blue Cross and Blue Shield, Health Advantage and USABLE Corporation provider networks.
