## Colonoscopy Episode Reimbursement Program

---

The Arkansas Health Care Payment Improvement Initiative (AHCPII) was developed as a joint effort between Arkansas Medicaid, QualChoice and Arkansas Blue Cross and Blue Shield, its affiliates and subsidiaries (Arkansas Blue Cross). More information may be found within this manual or at [www.paymentinitiative.org](http://www.paymentinitiative.org).

The **Colonoscopy** Episode Program will incentivize better coordination of care, encourage clinical effectiveness, and reward high quality care in order to reduce complications that threaten quality and increase costs.

### Episode Definition

---

A core component of this program is episodes of care. An episode is the collection of care provided to treat a particular condition over a given length of time. The colonoscopy episode includes all care related to the procedure. A colonoscopy episode spans from 30 days prior to the procedure to 30 days after the procedure. Included in the episode are all facility services, professional services, as well as any related labs and diagnostics, outpatient costs, and medications.

### Principal Accountable Provider (PAP)

---

For each episode, the provider that holds the main responsibility for ensuring that care is delivered at appropriate cost and quality will be designated as the PAP based on observed patterns of care. The PAP for the colonoscopy episode is the physician performing the colonoscopy procedure. The PAP for each episode is identified retrospectively through claims data. As leaders, however, PAPs will share in the savings and excess costs of episodes. A provider must have five or more eligible cases of an episode to be considered a PAP. For example, a physician must have performed at least five eligible colonoscopy episodes. The provider billing for the service on the claim is held responsible in the episode calculations. For this reason accurate coding is essential.

### Claims Submission

---

Claims filing procedures will be the same as they are today as described in Arkansas Blue Cross' Provider Network Agreements and provider manuals.

### Supplemental Quality Measures

---

In order to participate in upside savings, providers must meet:

1. A quality metric related to the 30-day readmission rate using the same re-admission criteria as CMS.
2. Additionally, PAPs will receive reports highlighting their performance on cecalintubation rate, average withdrawal time, intestinal perforation rate, and post-polypectomy/ biopsy bleed rate, if applicable, for each patient must be entered via the AHIN portal in order for the PAP to participate in sharing any applicable savings.

**GIQuIC Registry Pilot for 2017.** For providers participating in GIQuIC (GI Quality Improvement Consortium, Ltd.), Arkansas Blue Cross and Blue Shield is piloting a new process for capturing Colonoscopy Episode of Care Quality Information. Arkansas Blue Cross

recognizes that participating in a benchmarking registry initiative like GIQuIC requires facilities to establish the processes for tracking and reporting in an efficient and reliable manner, and readies facilities for future quality and performance expectations.

Principal Accountable Providers (PAPs) that participate in the GIQuIC registry may supply their year-end report to satisfy the portal entry requirements. Submission of the GIQuIC registry information for the reporting time period (January - December 2017) to the [APIICustomerSupport@arkbluecross.com](mailto:APIICustomerSupport@arkbluecross.com) email address will suffice for documentation. Arkansas Blue Cross will review the GIQuIC reports and manually update the quality metrics for these providers. If you have questions about our Colonoscopy Episode of Care or the GIQuIC registry pilot, please contact the Arkansas Blue Cross Episodes of Care Analyst Team at 1-888-800-3283 or [APIICustomerSupport@arkbluecross.com](mailto:APIICustomerSupport@arkbluecross.com).
