Coronary Artery Bypass Graft (CABG) Episode Reimbursement Program

The Arkansas Health Care Payment Improvement Initiative (AHCPII) was developed as a joint effort between Arkansas Medicaid, QualChoice and Arkansas Blue Cross and Blue Shield, its affiliates and subsidiaries (Arkansas Blue Cross). More information may be found within this manual or at www.paymentinitiative.org.

The CABG Episode Program (Program) will incentivize better coordination of care, encourage surgical effectiveness, and reward high quality care in order to reduce complications that threaten quality and increase costs.

Episode Definition

A core component of this program is episodes of care. An episode is the collection of care provided to treat a particular condition during a specific length of time. Included in the episode are all related services on the day of the procedure and 30 days after the procedure, including inpatient and outpatient facility services, professional services, and related medications.

Principal Accountable Provider (PAP)

For each episode, the provider that holds the main responsibility for ensuring that care is delivered at appropriate cost and quality will be designated as the PAP based on observed patterns of care. The PAP for the CABG episode is the cardiothoracic surgeon performing the CABG procedure. The PAP for each episode is identified retrospectively through claims data. As leaders, however, PAPs will share in the savings and excess costs of episodes. A provider must have five or more eligible episodes to be considered a PAP. For example, a physician must have performed at least five eligible CABG procedures. The provider billing for the service on the claim is held responsible in the episode calculations. For this reason accurate coding is essential.

Claims Submission

Claims filing procedures will be the same as they are today as described in Arkansas Blue Cross' Provider Network Agreements and provider manuals.

Supplemental Quality Measure

In order to participate in upside savings, providers must meet:
1. A Quality Metric related to the percent of episodes where a patient visits an outpatient physician within 30 days after initial discharge. Visits are identified as evaluation and management procedure codes that are performed in the provider's office, patient's home, or a rural health clinic by specialists in the following list: general practice, family practice, internal medicine, pediatric medicine, geriatric medicine, primary care nurse practitioners, primary care physician assistant, or pulmonary medicine. The rate to satisfy this measure must be equal to or greater than 50%.
2. The number of eligible episodes flagged with Corticosteroid prescriptions filled 30 days before or after an initial trigger, divided by the total number of eligible episodes for a provider. To satisfy this measure the rate must be equal to or greater than 50%.

[Coronary Artery Bypass Graft (CABG) Algorithm Summary](#)

Triggers	An episode is triggered when a patient shows a claim with a HCPCS procedure code for "coronary artery bypass graft(s)" (CABG). For procedure codes, please see dataset.
PAP assignment	The Principal Accountable Provider (PAP) for a CABG episode is the provider performing the procedure, must be enrolled in an Arkansas Blue Plan provider network and reflect any of the following specialty designations: General Surgery, Cardiology, Internal Medicine, Neurosurgery, Diagnostic Radiology, Thoracic Surgery, Vascular Surgery, Cardiac Surgery, Emergency Medicine, Interventional Radiology
Exclusions	Episodes meeting one or more of the following criteria will be excluded: A. The patient has claims or enrollment records that indicate coordination of benefits with another payer not associated with the Arkansas Blue Plans within the duration of the episode B. The patient does not have continuous coverage with at least one Arkansas Blue Plan throughout the entire episode C. The patient has a coordination of benefits with another payer D. The overall episode cost for the patient exceeds the outlier criteria. Currently, the outlier threshold is set at three standard deviations above the average episode cost for all patients otherwise included in the reporting period for all PAPs. E. The patient expired or was discharged against medical advice F. Patient age on date of trigger procedure is less than 18 or greater than 65 G. Trigger procedures that do not have a corresponding facility claim H. The patient had more than one valve procedure performed I. The episode window overlaps with another episode J. The CABG procedure was a converted from a PCI K. Provider contract with Arkansas Blue Cross terminated prior to episode report publication L. The patient's claims indicate any of the following co-morbidities within 365 days prior to the procedure and the end of the episode: Abortion complications, Amnios, Arteritis NOS, Bladder cancer, Bone cancer, Brain cancer, Breast cancer, Bronchial/lung cancer, Cervix cancer, Colon cancer, Esophageal cancer, ESRD (end-stage renal disease), Female genital cancer, Fetal disturbances, Forceps or vacuum extractor delivery, GI/Perit Cancer, Head/Neck cancer, HIV, Hodgkin's lymphoma, Kidney/renal cancer, Leukemias, Liver cancer, Maintenance chemical, Male genital cancer, Malignant neoplasm, Malposition, Multiple myeloma, Neoplasm unspecified, Non-Hodgkin's lymphoma, Other perinatal diagnosis, Other primary cancer, Other respiratory cancer, Ovarian cancer, Pancreas cancer, Episode overlaps with another episode, Pelvic obstruction, Perinatal jaundice, Poison nonmedical, Polyarteritis nodosa and allied conditions, Prostate cancer, Rectum/anus cancer, Respiratory distress, Skin melanoma, Spontaneous abortion, Stomach cancer, Suicide and intentional self-inflicted injury, Testicle cancer, Thyroid cancer, Transplant, Umbilical cord complications, Urinary organ cancer, Uterus cancer, Louse-borne typhus, Dialysis, Complications from organ transplants M. Patient is an Exchange member N. Patient is an Access Only member O. Non-par self-insured groups: ABB Inc. (ABB/Baldor and Thomas & Betts), Green Bay Packaging, Hytrol Conveyor Co, Inc, Mana, Nabholz Inc, Navistar Inc, NYSC NYS Holding Company (Nucor), Replacement Parts, Riceland Foods Inc, Southern Steel & Wire (effective 1/1/16), and White River Medical Center
Episode time window	A CABG episode begins on the day of the trigger procedure (even if patient is admitted before the day of the procedure) and ends 30 days after the trigger date.

Claims included	The following services are included if incurred within the episode: A. All claims for inpatient admissions. Claims with a DRG on the CMS list of exclusions for cardiac surgery will not be included in the episode. B. All claims in the following places of service that show a CABG related ICD-9-CM diagnosis: inpatient professional, emergency room, skilled nursing facility, comprehensive inpatient rehab facility C. All claims for select CPT/HCPCS procedures in the following places of service: office, outpatient facility, ambulance After all above criteria are applied, remaining claims will be excluded for select CPT/HCPCS procedures, regardless of the place of service in which it is billed.
Quality measures	*Quality measures "to pass" (payment related):* A. There are currently no measures linked to Gain Sharing. *Quality measures "to track" (not payment related):* A. Average length of pre-procedure inpatient stay B. Percentage of patients admitted on day of procedure C. Percentage of patients for which an internal mammary artery is used
Utilization	There are no utilization measures at this time
Adjustments	The total reimbursements attributed to the PAP will be adjusted based on complications that resulted in variations in treatment using a multiplier determined by regression. Over time, risk factors may be added or subtracted based on new research and/or empirical evidence.
Trigger codes	Claims with following codes are considered when triggering an episode: **HCPCS:** 33510, 33511, 33512, 33513, 33514, 33516, 33517, 33518, 33519, 33521, 33522, 33523, 33533, 33534, 33535, 33536, S2205, S2206, S2207, S2208, S2209
