Percutaneous Coronary Intervention Episode Reimbursement Program

The Arkansas Health Care Payment Improvement Initiative (AHCPII) was developed as a joint effort between Arkansas Medicaid, QualChoice and Arkansas Blue Cross and Blue Shield, its affiliates and subsidiaries (Arkansas Blue Cross). More information may be found within this manual or at www.paymentinitiative.org.

The **PCI** Episode Program will incentivize better coordination of care, encourage clinical effectiveness, and reward high quality care in order to reduce complications that threaten quality and increase costs.

Episode Definition

A core component of this program is episodes of care. An episode is the collection of care provided to treat a particular condition over a given length of time. The PCI episode includes all related services if a diagnostic angiogram is done within 30 days prior to the PCI procedure and 30 days after PCI procedure, including inpatient and outpatient facility services, professional services, and related medications. If no diagnostic angiogram is performed, episodes will start on the date of the PCI and the episode will include 30 days after PCI procedure, including inpatient and outpatient facility services, professional services, and related medications. Discharges will be included for both types of episodes, even if the readmission discharge is after 30 day period.

Principal Accountable Provider (PAP)

For each episode, the provider that holds the main responsibility for ensuring that care is delivered at appropriate cost and quality will be designated as the PAP based on observed patterns of care. The PAP for the PCI episode is the Interventional Cardiologist or Interventional Radiologist performing the PCI procedure. The PAP for each episode is identified retrospectively through claims data. As leaders, however, PAPs will share in the savings and excess costs of episodes. A provider must have five or more eligible cases of an episode to be considered a PAP. For example, a physician must have performed at least five eligible PCI episodes. The provider billing for the service on the claim is held responsible in the episode calculations. For this reason accurate coding is essential.

Claims Submission

Claims filing procedures will be the same as they are today as described in Arkansas Blue Cross' Provider Network Agreements and provider manuals.

Supplemental Quality Measures

In order to participate in upside savings, hospitals must meet:

1. A quality metric related to the percent of episodes where a patient visits an outpatient physician within 30 days after initial discharge. Visits are identified as evaluation and management procedure codes that are performed in a provider's office, patient's home, or a rural health clinic by specialists in the following list: general practice, family practice, internal medicine, pediatric medicine, geriatric medicine, primary care nurse practitioners, primary care physician assistant, or pulmonary medicine. The rate to satisfy this measure must be equal to or greater than 50%.

2. The number of eligible episodes flagged with Corticosteroid prescriptions filled 30 days before or after initial trigger, divided by the total number of eligible episodes for a provider. To satisfy this measure, this rate must be equal to or greater than 50%.

PAP assignment	The Principal Accountable Provider (PAP) for an episode is the Interventional Cardiologist or Interventional Radiologist who is enrolled in an Arkansas Blue Plan provider network that performs services for the patient with PCI code. If the patient transfers from one facility to another, both of which having a PCI DRG code, then the final discharging facility will be the PAP.

The patient has claims or enrollment records that indicate coordination of benefits with another payer not associated with the Arkansas Blue Plans within the duration of the episode B. The patient does not have continuous coverage with at least one Arkansas Blue Plan throughout the entire episode C. The overall episode cost for the patient exceeds the outlier criteria. Currently, the outlier threshold is set at three standard deviations above the average episode cost for all patients otherwise included in the reporting period for all PAPs D. The patient was discharged against medical advice or due to expiration. E. PCI that converts to CABG within 1 day F. Patients is less than 18 years old G. Patient is 65 years or older H. Episode time window	<p>Included in the episode are all related services if a diagnostic angiogram is done within 30 days prior to the PCI procedure and 30 days after PCI procedure, including inpatient and outpatient facility services, professional services, and related medications. If no diagnostic angiogram performed episodes will start on the date of the PCI and episode will include 30 days after PCI procedure, including inpatient and outpatient facility services, professional services, and related medications. Claims included	<p>The following services are included if incurred within the episode:</p> <ul style="list-style-type: none"> A. All claims for inpatient admissions. Claims with a DRG on the CMS list of exclusions for cardiac surgery will not be included in the episode. B. All claims in the following places of service that show a CABG related ICD-9-CM diagnosis: inpatient professional, emergency room, skilled nursing facility, comprehensive inpatient rehab facility C. All claims for select CPT/HCPCS procedures in the following places of service: office, outpatient facility, ambulance D. For providers that have 20 or less episodes and have two or less episodes flagged for an adverse outcome, we will excuse one of the episodes due to small sample size.
